Imported Clay Claddings

Clay Claddings

Clay wall Tiles is for imitating the look of the brick wall. The thickness of terracotta wall tiles is around 10 to 15 mm. This brick-like tile can fix on a rough plastered wall using tile adhesives. It is available in multiple sizes. The most common size is 9 x 3 inches, which is the size of standard brick .

Natural stone

Natural stone is preferred for a more authentic, rustic and durable finish. Stone cladding will dramatically change the look and feel of any wall, pillar, column or surface it is applied to. It's elegance speaks for itself when you see the stunning appearance it portrays.
